Karan Micro Industries

<http://www.karanindustriesindia.com/>

We are engaged in manufacturing, trading and supplying of Air Compressor, and Air Compressor Spare Parts that are extensively demanded in automobile, marine, aeronautical and electronics industries.

About Us

Established in the year **1990**, we “**Karan Micro Industries**” are acknowledged as a prominent manufacturer, supplier, trader and service provider, of an extensive assortment of **Air Compressors**. The products offered by us are manufactured using excellent quality material that is procured from most trusted and reliable vendors of the market with the aid of our procuring agents. These spare parts are highly appreciated by clients for their durability, corrosion & abrasion resistance, dimensional accuracy, fine finishing, precision engineering, robust construction and easy installation. All our products are widely applicable in various industries such as electrical, pumps, marine, automobile and textile. Moreover, to cater to the variegated requirements of customers, we offer our range in various sizes and dimensions. We have developed a multifaceted infrastructure facility at our premises that helps us in accomplishing the business operations in a systematic manner. This facility is installed with advanced technology and high-tech machines that are required for delivering quality spare parts as well as services. Moreover, to manage and control all the trade activities, we have appointed a competent team of professionals. These experts enable us to offer an impeccable array of products to the customers. The quality controllers of our team stringently inspect the offered range on certain parameters of quality so as to ensure its...
